Colby Fire Impact Area **YELLOW LEVEL** Flooding Protocol in Effect

On March 30, 2014 the City of Glendora has declared the following **YELLOW LEVEL** emergency protocol in effect for the Colby Fire Impact Area. The alert level was raised to yellow from green due to NOAA forecasting a storm late Monday night into Tuesday morning that could deliver between 1/2 inch to 1 inch of rain. There could be the possibility of thunderstorms associated with this which could cause heavier downpours that may cause light mud flows in some areas of the Colby Fire Impact Area. Current forecasts by either NOAA or LA County Flood Control do not indicate any heavy potential mud flows.

Yellow alert asks residents in the Impact Area to be alert and mindful that there is a storm forecasted and conditions could change and be more intense than currently forecasted. Parking restrictions are in effect and residents are asked to remove trash cans as soon as Athens Services has collected their contents.

The Glendora Police Department will increase patrols in the Impact Area to assist in keeping a physical presences in the area should the need arise.

Residents are encouraged to read more about the color alert system at www.cityofglendora.org/colbyfire and sign up for Nixle alerts.

The city, in cooperation with its partner agencies, will continue to monitor the weather conditions and will modify the alert as appropriate.

The **YELLOW LEVEL** emergency protocol includes:

- ***NO EVACUATION** orders in effect
- *Rain-related parking restrictions in effect
- *Residents directed to remove vehicles, trash bins, other obstructions from streets and/or travel lanes as they will be subject to tow or removal by authorities
- ***NO RESTRICTED ENTRY** to impact area/potentially impacted areas.

The Colby Fire Impact Area includes all properties north of Sierra Madre between the western city boundaries of Azusa/Glendora (Yucca Ridge) to the eastern boundary of properties on the west

side of the Little Dalton Wash (near Loraine Ave.). These areas have the highest risk of being impacted by flooding/debris flows from rainfall due to the loss of vegetation from the foothills.

Residents are strongly encouraged to stay connected to the Glendora Police Department's electronic notification systems, and to persistently monitor weather conditions. Always remember to dial 9-1-1 in the event of a life threatening emergency.

Sandbag information can be obtained from the city website listed below.
